

Website Pricing Options

Three ways to structure the purchase of the site built for Ducks Burger Bar — pick the shape that fits, all deliver the same finished site.

RECOMMENDED		
Option A — Flat Buyout \$3,200 one-time • Full ownership on signing • Hosting/domain in your name • 2 rounds of revisions • No ongoing commitment	Option B — Lower Entry + Care Plan \$1,800 + \$125/mo • Lower upfront cost • Hosting, domain & uptime covered • 2 content edits / month included • 6-mo min, cancel anytime after	Option C — Tiered Packages \$1,800–\$4,200+ • Basic / Standard / Premium • Scales in SEO, revisions, hosting • Premium adds self-service menu editor • Best if scope is still being negotiated

Why This Range

Comparable custom-coded small-business sites (not template/Wix/Squarespace builds) run \$2,500–\$6,000. This site is hand-built in Next.js with custom animated components, a “Unlimited” membership promo page that drives repeat visits, real photo/video assets, and click-to-call/click-to-email contact links — already live and deployed. It’s priced as a finished asset, not an estimate.

Recommendation: Open with Option A at \$3,200. If price is a sticking point, offer Option B rather than discounting — it trades a lower upfront number for recurring revenue. Avoid pricing below ~\$2,200 flat.
